KEY COMPONENTS

GEAR TOOTH SENSOR

Gear sensor coupled with parking sensor to detect unwanted wheel rolling and engagement of safety brake.

ANGLE POSITION SENSOR

Angle position sensor to detect rotation of linkages and brackets.

EV ISOLATION RELAYS

KT & MHV Reed Relays are designed for High Voltage Battery Management Systems in E-Vehicles, Solar Invertors or Energy System Storage.

GEAR TOOTH SENSOR

Gear tooth sensor for detecting the rotation and speed of shafts, gears, wheels, and engine RPMs.

REED/HALL SENSOR

MKO4/MHO4 proximity sensor detects if lids, compartments or doors are open. Draws no power in its normally open state (Reed).

REED PROXIMITY SENSOR

Reed proximity sensor can detect engagement of doors, lids, or locking systems. Draws no power in its normally open state.

REED FLOAT SENSOR

The LS04 Series Reed Float Sensor alerts when the fluid level is at a critical low point or multiple points as needed.

SMD REED SENSOR

Reed switch and over molded reed switches available to operate on/off lights, compartment openings, and alarm systems.
